

PUBLIC NOTICE

Dear Resident:

The Town wishes to advise you that beginning the week of July 26 and for a duration of approximately four months, road widening and storm sewer construction will begin on Topsail Road. The Contractor will be mobilizing equipment and setting up signs and delineators during this week.

During construction you will be visited by a representative of the Town's Engineering Consultant, BAE Newplan. This person will be your primary contact should you have any questions or concerns. All the contact information will be forwarded to you during the initial visit. This person will also discuss the extent of work required to be completed on or near your property. All reinstatement of your property including trees, fences, driveways, etc. will be completed during construction. Please be advised that if you currently have parking spaces within the Town right of way they may have to be relocated. All costs associated with this or any work on your property will be borne by the Town. If the Town purchased a piece of property from you, a new survey will be completed at the end of construction.

Construction will start each day at 6:00 am and continue til dark for the duration of the project. Residents are advised to be aware of the heavy equipment in the area and take measures to ensure the safety of yourself, your children and any pets during construction. This equipment operates at high noise levels and the visibility of the operators can be limited. You will experience a fair amount of dust, noise and other disturbances during the construction and, as with any construction project, delays can be expected in accessing the area or moving through the construction zone. Residents are advised to use alternate routes when possible.

During the construction residents may experience discolored water, air in the water and possible disruption to your current water supply. If this happens you are advised to contact the site representative immediately.

The Town apologizes for any inconvenience that this may cause and asks residents for their understanding and patience during construction. If you have any further questions or concerns please contact the Town Office at 782-1400.
